Passion to Perform

#### 2Q2014 Financial Data Supplement

Deutsche Bank's financial data in this document have been prepared under IFRS. Comparative financial information for the year 2012 presented throughout this document has been restated in the context of the adoption of IFRS 10.

Due to rounding, numbers presented throughout this document may not add up precisely to the totals we provide and percentages may not precisely reflect the absolute figures.

All segment figures reflect segment composition as of 30 June 2014.

#### **Definition of certain financial measures**

#### **Profitability ratios**

In connection with the implementation of the Group's communicated strategy, the Group considers the post-tax return on average active equity, both on a Group and a segment basis. The post-tax return on both, average shareholders' equity and average active equity, at the Group level reflects the reported effective tax rate for the Group. For the post-tax return on average active equity of the segments, the Group effective tax rate was adjusted to exclude the impact of permanent differences not attributable to the segments.

Post-tax return on average shareholders' equity: Net income (loss) attributable to Deutsche Bank shareholders (annualized), which is defined as Net income (loss) excluding post-tax income (loss) attributable to noncontrolling interests as a percentage of average shareholders' equity.

**Post-tax return on average active equity**: Net income (loss) attributable to Deutsche Bank shareholders (annualized), which is defined as Net income (loss) excluding post-tax income (loss) attributable to noncontrolling interests, as a percentage of average active equity.

**Pre-tax return on average shareholders' equity:** Income (loss) before income taxes attributable to Deutsche Bank shareholders (annualized), which is defined as IBIT excluding pre-tax noncontrolling interests, as a percentage of average shareholders' equity.

**Pre-tax return on average active equity:** Income (loss) before income taxes attributable to Deutsche Bank shareholders (annualized), which is defined as IBIT excluding pre-tax noncontrolling interests, as a percentage of average active equity.

**Average Active Equity:** We calculate active equity to make comparisons to our competitors easier and we refer to active equity for several ratios. However, active equity is not a measure provided for in IFRS and you should not compare our ratios based on average active equity to other companies' ratios without considering the differences in the calculation.

Tax rates applied in the calculation of average active equity are those used in the financial statements for the individual items and not an average overall tax rate. Starting 2013, we refined our allocation of average active equity to the business segments to reflect the further increased regulatory requirements under CRR/CRD 4 and to align the allocation of capital with the communicated capital and return on equity targets. Under the new methodology, our internal demand for regulatory capital is derived based on a Common Equity Tier 1 ratio of 10.0 % at a Group level and assuming full implementation of CRR/CRD 4 rules. Therefore, the basis for allocation, i.e., risk-weighted assets and certain regulatory capital deduction items, is also on a CRR/CRD 4 fully-loaded basis. As a result, the amount of capital allocated to the segments has increased, predominantly in CB&S and the NCOU. The figures for 2012 were adjusted to reflect this effect. In 2012, we derived our demand for regulatory capital assuming a Core Tier 1 ratio of 9.0 % (under Basel 2.5 rules), reflecting increased regulatory requirements at the time. If our average active equity exceeds the higher of the overall economic risk exposure or the regulatory capital demand, this surplus is assigned to Consolidation & Adjustments. Effective July 1, 2013, the definition of active equity has been aligned to the CRR/CRD 4 (Basel 3) framework. Under the revised definition, shareholders' equity for 2012 and 2013 is adjusted only for dividend accruals (i.e. accumulated other comprehensive income (loss) excluding foreign currency translation, net of taxes, is now part of active equity).

#### **Definition of certain financial measures (cont.)**

#### Leverage ratio measures

We calculate a IFRS leverage ratio by dividing IFRS total assets by IFRS total equity.

We also calculate a leverage ratio according to the CRR/CRD 4 on a fully loaded basis as a non-GAAP financial measure by dividing Tier 1 capital by the CRR/CRD 4 exposure measure. The key adjustments we apply to IFRS total assets to derive the CRR/CRD 4 exposure measure are as follows:

- Derivatives: reflect netting against corresponding liabilities permitted for regulatory purposes, partially offset by recognition of Potential Future Exposure (notional times supervisory add-on factor, depending on product and maturity, after application of regulatory netting with a floor of 40%);
- Securities Financing Transactions: based on the "Supervisory Volatility Adjustments Approach" which encompasses regulatory netting, collateral recognition and supervisory haircuts, and is also applied for noncash SFT which are not reported on the balance sheet:
- Remaining Assets: We apply trade date accounting for purchases or sales of financial assets requiring physical delivery of the respective assets, resulting in a temporary balance sheet gross-up until settlement occurs. We believe that the increase of the exposure measure arising from the use of trade date accounting should be adjusted for by assuming that unsettled positions subject to the application of trade date accounting are settled immediately, regardless of their accounting treatment;
- Off-balance sheet exposure: undrawn commitments are recognized in the exposure measure with 100 % of their notional value, except for unconditionally cancellable commitments which get a preferred weight of 10 %, plus other off-balance sheet exposures e.g. in the form of guarantees or L/Cs that receive a weight of 100 %, or alternatively either 50 % or 20 % for certain trade finance related products;
- Regulatory adjustments, which include transition effects from an accounting to a
  regulatory view, e.g. for differences in consolidation circles, as well as regulatory
  capital deductions items (including goodwill and intangibles, deferred tax assets on
  unused tax losses) that can also be deducted from the exposure measure to ensure
  consistency between the numerator and denominator of the ratio.

The adjusted Tier 1 capital comprises our fully loaded Common Equity Tier 1 capital plus all Additional Tier 1 instruments that were still eligible according to the transitional phase-out methodology of the CRR/CRD 4.

#### **Cost ratios**

**Cost/income ratio**: Noninterest expenses as a percentage of total net revenues, which are defined as net interest income before provision for credit losses plus noninterest income.

**Compensation ratio**: Compensation and benefits as a percentage of total net revenues, which are defined as net interest income before provision for credit losses plus noninterest income.

**Noncompensation ratio**: Noncompensation noninterest expenses, which are defined as total noninterest expenses less compensation and benefits, as a percentage of total net revenues, which are defined as net interest income before provision for credit losses plus noninterest income.

#### Other key ratios

**Diluted earnings per share**: Net income (loss) attributable to Deutsche Bank shareholders, which is defined as net income (loss) excluding noncontrolling interests, divided by the weighted-average number of diluted shares outstanding. Diluted earnings per share assume the conversion into common shares of outstanding securities or other contracts to issue common stock, such as share options, convertible debt, unvested deferred share awards and forward contracts.

**Book value per basic share outstanding**: Book value per basic share outstanding is defined as shareholders' equity divided by the number of basic shares outstanding (both at period end).

**Tangible book value per basic share outstanding:** Tangible book value per basic share outstanding is defined as shareholders' equity less goodwill and other intangible assets, dividied by the number of basic shares outstanding (both at period-end).

**Tier 1 capital ratio**: Tier 1 capital, as a percentage of the risk-weighted assets for credit, market and operational risk.

**Common Equity Tier 1 capital ratio**: Common Equity Tier 1 capital, as a percentage of the risk-weighted assets for credit, market and operational risk.

#### **Footnotes**

21

- Source for share price information: Bloomberg, based on XETRA; high and low based on intraday prices. To reflect the capital increase 2014 the historical share prices until and incl. June 5, 2014 [last trading day cum rights] have been adjusted with retroactive effect (multiplied by the correcting factor of 0.9538).
- 2. Including numerator effect of assumed conversions.
- 3. Definitions of ratios are provided on pages 19 and 20 of this document.
- The reconciliation of average active equity is provided on page 17 of this document.
- 5. At period end.
- 6. Risk weighted assets and capital ratios are based upon Basel 2.5 rules thru Dec 31, 2013 and upon CRR/CRD 4 fully-loaded since Jan 1, 2014.
- 7. Includes Corporate Banking & Securities, Global Transaction Banking, Deutsche Asset & Wealth Management, Private & Business Clients and Consolidation & Adjustments.
- 8. Segment assets represent consolidated view, i.e. the amounts do not include intersegment balances.
- Starting 2013, the Group refined its allocation of average active equity to the business segments to reflect the further increased regulatory requirements under CRR/CRD 4. Figures for 2012 were adjusted accordingly. For details please refer to page 19.
- 10. Includes net interest income and net gains (losses) on financial assets/liabilities at fair value through profit or loss, net fee and commission income and remaining revenues.
- 11. Includes revenues from ETF business.
- 12. Excludes fee and commission income and remaining revenues. See page 5 for total revenues by product.
- 13. Covers origination, advisory and other products.
- 14. Reflects compensation and benefits of front office employees and allocated compensation and benefits of related Infrastructure functions (allocation on a pro forma basis).

- 15. Reflects front office employees and related Infrastructure employees (allocated on a pro forma basis).
- 16. The impact of releases of certain allowances relates to loan loss allowances which were established by Postbank prior to change of control. Releases of such allowances reduce provision for credit losses in Postbank's stand-alone financial statements. At the consolidated level of DB Group / PBC, these releases lead to an increase in interest income (because the underlying loans were consolidated at their respective fair value at change of control).
- 17. Includes costs related to Postbank integration.
- 18. Contains the major core business activities of Postbank AG as well as BHW and norisbank.
- 19. Includes provision for loan losses and provision for off-balance sheet positions.
- 20. Impaired loan coverage ratio: balance of the allowance for loan losses as a percentage of impaired loans (both at period end).
- 21. Regulatory capital amounts, risk weighted assets and capital ratios are based upon Basel 2.5 rules thru Dec 31, 2013 and upon CRR/CRD 4 fully-loaded since Jan 1, 2014.
- 22. Excludes transitional items pursuant to section 64h (3) German Banking Act.
- 23. All figures for 1-day holding period, 99% confidence level.
- 24. Starting Dec 31, 2012 considers all trading exposures including Sal. Oppenheim and BHF.
- 25. Amounts refer to the time period between January 1st and the end of the respective quarter.
- 26. 4Q2013 and FY2013 are based on CRR/CRD 4 pro-forma figures
- 27. Based on IBIT attributable to Deutsche Bank shareholders, definitions of ratios are provided on pages 19 and 20 of this document.
- 28. Excluding actuarial gains (losses) related to defined benefit plans, net of tax
- 29. Includes Additional Tier 1 Notes, which constitute unsecured and subordinated notes of Deutsche Bank and are classified as equity in accordance with IFRS.
- 30. As of December 31, 2013
